

Adams County 2009 Wheat Trials

Conducted by the
Purdue University Cooperative Extension Service
in cooperation with the Adams County Crops Committee

Plot #1 Information

Location: 700 S & approximately 200 W, Berne
Planting date: 10/13/08 with JD 750 drill
Previous crop: Soybeans
Tillage: No-till
Length of plot: 580 feet
Pounds/Acre: 165
Depth: 1 1/4 inches
Fertilizer/Herbicides:
100#/acre of Nitrogen split in fall/spring
250#/acre of fertilizer
Harvest date: 7/13/09
Average yield: 80.4 bushel/acre

Plot #2 Information

Location: 500 S & 000, Berne (Lehman Feed Mill)
Planting date: 10/13/08 with JD 750 drill
Previous crop: Soybeans
Tillage: No-till
Length of plot: 515 feet
Pounds/Acre: 150
Depth: 1 1/4 inches
Fertilizer/Herbicides:
250#/acre 9-23-30 & 300#/acre Gypsum
100# actual N/acre Nitrogen
1pt/A carbon soil conditioner
1 qt/A Monty's 8-16-8
Insecticide: 2.2 oz/acre Baythroid
Herbicide: MCPA; Harmony GT
Fungicide: 10 oz/acre Stratego
Harvest date: 7/10/09
Average yield: 81.4 bushel/acre

We would like to thank the Paul Bluhm and Jeff Lehman families for their efforts and cooperation with another successful year of wheat trials. We plan to continue the wheat program every other year as we have in the past. And once again, thanks to the seed companies' participation in the program.

—Brad Kohlhagen
Adams County ANR Extension Educator
